Dear Mr Britton,

On behalf of the Chairman and all the Trustees of the WELLINGTON Trust may I thank you very much indeed for your very kind and generous donation to the ship of the CP reference electrodes for our new (first ever) Cathodic Protection System.

Our wonderful WELLINGTON has been moored here at Temple Stairs on the Thames since 1947 and we have relied for our hull protection on our paint job and the fact that we sit in very brackish water on this stretch of the Thames. A chance social visit from Pat Lydon earlier this year soon put us right on that score and he very kindly constructed a system for us which we commissioned just over a month ago. And how delighted we are to have it in place!

If you are ever in Town and would like to visit us for look round and perhaps a glass and a sandwich do please make contact. Additionally, if it would be of any help to you to use WELLINGTON to advertise your wares, we would be delighted and indeed to allow access for any of your clients? Once again, it was most kind of you to help us and our fine vessel.

Yours sincerely,
Angus Menzies
